

PMSE demand : Channel 69 (854 - 862 MHz)

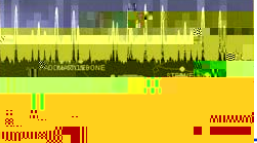

- Heaviest PMSE use is in Ch 69
- Ch 69 is the only UHF allocation for UK-wide professional wireless microphone use
- Wireless microphones are susceptible to interference from local higher-power systems (e.g. mobile phones)
- Any re-allocation of Ch 68 must take account of PMSE use in Ch 69

SE demand: Major sport events

Grand Prix, Cheltenham Festival,
Open Championship, Wimbledon)
