### **JFMG gears-up for Band Manager opportunities**

We are delighted to announce that Arqiva has acquired 100% of shares in JFMG Ltd from ITV Network Ltd and RadioCentre Ltd.

As you may know, Arqiva provides much of the infrastructure behind television, radio and wireless communications in the UK. The company also provides a wide range of services to broadcasters including productions facilities, satellite newsgathering and outside broadcasts.

We will continue to operate under our own JFMG identity and the established team will remain fully responsible for delivering a high-quality spectrum management and licensing service for programme makers into 2010.

We believe this is a very good deal for both organisations and for the PMSE industry. It secures the investment, resources and commitment we will need to underpin our preparations for success in the PMSE band manager award. JFMG and Arqiva share a vision for developing this business as an expert band manager.

By providing us with the support of long-term shareholders committed to band management, and making available additional spectrum purchased by Arqiva, we will be well placed to build on our strengths and broaden our reach through access to additional technical expertise.

Arqiva recognises that the JFMG team and its unique resources have achieved great success in the PMSE sector and is committed to maintaining this clear focus by ensuring continuity in the responsive and expert service delivered to PMSE users.

We would like to assure you that we will continue to have the best interests of the PMSE community at heart and look forward to developing our relationship in the light of this new partnership.

A handwritten signature in blue ink that reads 'Paul'.
